

BBioNets

Boosting the adoption
of Bio-Based Technologies

Cross-fertilisation Meeting

1st Central Europe ETR Meeting

Interconnection between the Czech & Polish FANs

11 December 2024 | Online

Concept

This cross-fertilisation meeting arises from the identification of regional realities, specific challenges and needs within the BBioNets regional Forest and Agriculture Networks (FANs). There are, however, commonalities to be found among FANs based on climate considerations, available biomass, practices, etc. When different FANs come together and network, this can only lead to a greater impact of their work, hence the objectives of these cross-fertilisation meetings:

- Exchange on common difficulties and concerns about applied Bio-Based Technologies (BBTs).
- Outline of breakthroughs and emerging opportunities.
- Capture and promotion of knowledge created by national EIP-AGRI Operational Groups (OGs).
- Facilitation of bilateral and multilateral collaboration among FANs and OGs

Objectives

The first meeting of the Czech & Polish FANs **wishes to focus** on livestock and agricultural waste management (to be decided with the speakers):

- **Topic 1:** Collection, handling, storage, treatment, and land application methods.
- **Topic 2:** Challenges hindering their exploitation (e.g. security issues, efficiency, transportation, availability, tech or knowledge limitations).
- **Topic 3:** Lessons learnt and good practices (e.g. nutrient recycling/recovery).
- **Topic 4:** Value chains.

Structure

Introduction

- Welcome and agenda presentation.

Session 1 - Overview of the livestock and agricultural waste management status in each region

- Presentation of common needs, biomass, current national funding, current BBTs identified, etc.

Session 2 – Panel discussion

- Short introduction of invited speakers.
- Knowledge exchange (short presentations by speakers regarding **the above-mentioned Topics**).
- Panel discussion (targeted questions to panellists to enhance further discussion with the FANs).
- Open discussion and identification of further collaboration potential with FANs and panellists.

Organiser

BBioNets - www.bbionets.eu

BBioNets is a three-year project aiming to bolster biomass reuse with Bio-Based Technologies (BBTs) and support climate resilience through mitigation of greenhouse gas emissions, circular economy and zero waste principles. It is a thematic network that relies on, promotes and further advances the work carried out by EIP-AGRI Operational Groups (OGs) with respect to the management and/or processing of agricultural and forest biomass with BBTs.

Participants

- Czech and Polish FAN members active/interested in livestock and agricultural waste management and relevant BBTs
- Representatives from relevant projects
- EU-CAP National Contact Points
- Farmers, foresters, Operational Group members

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Research Executive Agency (REA). Neither the European Union nor the granting authority can be held responsible for them.
